INTRODUCING BOOKINGX

Booking Engine that is specially designed for Restaurants

Developed by AVESTA CO., LTD.

What is BookingX ?

BookingX is a booking system that is designed from ground-up and developed to meet the needs of table booking and room booking for almost any kind of business. It's tailored made for restaurants, spa, co-working space, etc. and can be customized for other businesses as well.

With resilient software development process in mind, businesses could enjoy the most flexible customizable back-office booking system in the business.

Features : LINE Integration

- Support 2 booking channels : via web interface and/or LINE Official Account. You can choose either or both. You can configure the booking system to your LINE OA from our back office system by yourself in just a few clicks. Via this channel you can interact directly with your existing members. Secondly via Web UI, our WEB UI booking interface comes as a standard.

Features : Cloud Based Booking

- Our servers are located on dynamic cloud infrastructure in Singapore. It can sustain up to 200 bookings/second. It's reliable with no downtime from server-side since we have deployed this system several years ago.
Features : Payment Gateway

- The booking engine support standard payment gateways such as QRCode (Thai QR / Promptpay QR), Ksher, GB Primepay and Credit Card Payment Gateway

* Business owners have to apply to get merchant id by themserlves

Features : Back Office

- Our booking system comes with feature-rich back-office system. You can do almost everything related to booking by yourself. No need to wait for our support to get things done. From the back office you will be able to :
  - Configure service time (shift) : multiple service times are supported
  - Configure how many hours booking can be made prior to opening hours.
  - Configure special occasion names
  - Configure Day off (Songkran, Thai New Year etc)
  - Configure table , table name and make relationship with shift
  - Table Assigning process (table and shift relation)
  - Configure deposit and many more.
  - Floor Plan Display

Features : Google Calendar Integration
